

Arbortext Styler is a powerful XML-based stylesheet design tool. Designed to reduce publishing skills and maintenance costs, the Arbortext Styler user interface makes it easy to create and maintain stylesheets that support publishing to multiple types of output media like HTML5, ePub, RTF, PDF, and high quality print. Elizabeth Fraley explains the best way to construct Arbortext Styler stylesheets so that your maintenance work is drastically reduced and the ease of creating new stylesheets are straightforward and simple to do. Written to make stylesheet designers lives easier, she explains the method Single-Sourcing Solutions uses to develop new stylesheets in hours, rather than days. She shows readers how to: - develop and maintain stylesheets for multiple output types - simplify stylesheet creation - share formatting across media types - set up unique formatting for specific media types in a single stylesheet - modularize stylesheets to improves the accuracy, consistency and flexibility This book is for anyone who wants to puts styling in the hands of designers, reducing or eliminating the need for specialized programming skills.
