

Volume 310 of Methods in Enzymology is the first volume devoted solely to biofilm research methods. It provides a contemporary source book for virtually any kind of experimental approach involving biofilms. It includes bioengineering, molecular, genetic, microscopic, chemical, continuous culture, and physical methods. This volume will serve as a starting point for future developments. The critically acclaimed laboratory standard for more than forty years, Methods in Enzymology is one of the most highly respected publications in the field of biochemistry. Since 1955, each volume has been eagerly awaited, frequently consulted, and praised by researchers and reviewers alike. Now with more than 300 volumes (all of them still in print), the series contains much material still relevant today--truly an essential publication for researchers in all fields of life sciences.
