

The book is divided into 21 chapters. The author combines the basic theories and clinical practices of medical Immunology, and elaborates various causes of autoimmunity diseases, pathogenesis, immunological diagnosis, treatment and prevention. Additionally, it reflects contemporary progress in Immunology and in the area of clinical medicine. The author strives to help readers establish new awareness and concepts of a variety of autoimmune diseases from an immunological perspective. He focuses on combining the Immunology theories, laboratory technologies and new progress of bio-treatment with clinical practices.
