

Drug Politics is an enlightening new book by a man who knows this disturbing and dangerous subject. A former United States ambassador to Peru, David C. Jordan has testified before the U.S. Senate and House Foreign Relations committees and has consulted with various government security organizations. His account of government protection of the criminal elements intertwined with local and global politics challenges many of the assumptions of current drug policies. Using examples from South America, Mexico, Russia, and the United States, Jordan shows that the narcotics problem is not merely one of supply and demand. Jordan argues that many national and international financial systems are dependent on cash from money laundering, and some governments are far more involved in protecting than in combating criminal cartels.
