

Combined with the teaching resources accumulated in years of teaching practice, in view of the discipline characteristics of biological engineering, this book elaborates the essentials of biotechnology, including the gene engineering, cell engineering, enzyme engineering, and fermentation engineering. Knowledge in each chapter is expounded into section or even subsection. What's more, lecture notes are also equipped with charts, appendix and question banking, electronic teaching materials, web sites and so on, which is good for students to understand and apply the information. Safely to say, the book offers a three-dimensional teaching resources.

Get That Job! The complete, thorough, hands-on guide to the whole recruitment and selection process - for graduates and ambitious executives in early career, Structures of Power: Essays on Twentieth-Century Spanish-American Fiction (Suny Series in Latin American and Iberian Thought and Culture), Conversations On Mineralogy (1822), They made America great, Papers and Proceedings of the Royal Society of Tasmania: For the Year 1910 (Classic Reprint), Dizzy Lizzy and the Gigantic Bubblegum Balloon,
