

First published in 1919, this classic on holiness is a must-read. From the introduction by J. T. Logan: The doctrine of entire sanctification sustains such an important relation to the perfect salvation that Christ has purchased for the children of men that it cannot be overlooked or neglected without serious loss to the soul. Perhaps there is no essential doctrine of the Bible that is so little understood, and about which so much confusion exists in the minds of many good people, as this one. The design of this book is to throw light upon the subject. There are very few preachers who have such clear views concerning the doctrine and experience of entire sanctification as has the writer of this book entitled, *Holiness and the Human Element*. Most of the confusion and perplexity which has arisen in relation to the experience has been occasioned by a failure to understand the intimate relation existing between the physical, the mental and the spiritual natures with which we are endowed. In analyzing Christian experience in its bearing on this threefold nature, the author has made the clearest of distinctions, and by so doing has cleared away much of the fog and uncertainty that has settled around that phase of the subject. The author has been enabled to show what holiness really does for soul and for body, and has placed the standard just where it is found in the Word of God. If the standard of holiness is raised too high some will be discouraged and give up; if it is set too low some will be inclined to live in sin; hence the importance of having a standard that is neither too high nor too low, such as has been presented by the author of this volume. ***This edition includes an Active Table of Contents.
