

Despite an astonishing 100 million-fold range in adult body mass from bumblebee bat to blue whale, all mammals are formed of the same kinds of molecules, cells, tissues and organs and to the same overall body plan. A scaling approach investigates the principles of mammal design by examining the ways in which mammals of diverse size and taxonomy are quantitatively comparable. This book presents an extensive reanalysis of scaling data collected over a quarter of a century, including many rarely or never-cited sources. The result is an unparalleled contribution to understanding scaling in mammals, addressing a uniquely extensive range of mammal attributes and using substantially larger and more rigorously screened samples than in any prior works. An invaluable resource for all those interested in the design of mammals, this is an ideal resource for postgraduates and researchers in a range of fields from comparative physiology to ecology.

Brief But Comprehensive Psychotherapy: The Multimodal Way (SPRINGER SERIES IN BEHAVIOR THERAPY AND BEHAVIORAL MEDICINE), The Online Business Resource Report: All The Tools I Use Every Day In My Business!, SONGS WE ALL KNOW FOR PIANO BOOK 12 READ-EASE ARRANGEMENTS Sheet Music 1981, Das gestohlene Leben des Gad Lagoda (German Edition), Thermodynamics - Primary Source Edition, Great Northern R Co v.
