

How does one become the leader of the worlds newest superpower? And who holds the real power in the Chinese system? China has become the powerhouse of the world economy and home to 1 in 5 of the worlds population, yet we know almost nothing of the people who lead it. In *The New Emperors*, the noted China expert Kerry Brown journeys deep into the heart of the Communist Party. Chinas system might have its roots in peasant rebellion but it is now firmly under the control of a power-conscious Beijing elite, almost half of whose members are related directly to former senior Party leaders. Brown reveals the intrigue, scandal and murder surrounding the internal battle raging between two Chinas: one founded by Mao on Communist principles, and a modern China in which to get rich is glorious. At the centre of it all sits the latest Party Secretary, Xi Jinping - the son of a revolutionary, with links both to big business and to the Peoples Liberation Army. His rise to power is symbolic of the new dragons leading the worlds next superpower.
